Date _____

Dear Earth Team Volunteer:

Thank you for committing your time, energy and good will in support of the Lower Hudson River Watershed Streamwalk Program. Your assistance is greatly appreciated. Your efforts will go a long way in helping us understand the condition of the watershed, especially its in-stream and streamside characteristics.

Please consider the following as necessary components of your Streamwalk.

- Each volunteer must have the volunteer application filled out and signed by me before conducting a Streamwalk.
- Volunteers are encouraged to recruit others to help. Please ensure that they have filled out a volunteer application before conducting a Streamwalk. Applications and time sheets can be obtained from the ____ County Soil & Water Conservation District at (____)_____.
- Respect private property rights. If a landowner asks what you are doing, cordially inform he or she. If you are requested to leave the property, please do so. Information sheets with telephone numbers are included in each packet for the landowner's information as needed.
- Practice safety at all times. Always work in teams of two or more volunteers. This should be considered a light walk. If there is information that is too unsafe to record, note the site and the location on the assessment sheet.
- Return all completed packets to ____ County Soil & Water Conservation District with your time sheets filled out. **Please try to complete your segment(s) by _____, 2003/4.**

If you have any questions or concerns please contact the ____ County Soil & Water Conservation District at (____)_____ or e-mail _____. Thank you again for your help with this effort!

Sincerely,
